

Good Clinical Practice (GCP) Refresher

Good Clinical Practice (GCP) in South Africa encompasses the ethical and scientific standards that guide the conduct of clinical trials involving human participants. It ensures participant safety, data integrity, and regulatory compliance, ultimately contributing to the advancement of medical knowledge and the improvement of patient care.

Compliance with these guidelines is mandated.

Description

The **GCP Refresher Course** is designed to assist clinical researchers to refresh their knowledge in the main concepts and principles of GCP. The course includes updates relating to current regulations and guidelines.

Available as classroom or online training

Content

Introduction: What is the Purpose of the GCP Refresher Course?
Module 1: The Principles of GCP (including ICH GCP).

Module 2: SA GCP 2020 Update (including DoH 2015).
Module 3: Latest Developments.
Final Assessment.

Cost

Classroom - R1,650 (VAT incl.)
Online - R1,045 (VAT incl.)

WHC divisions | projects:
Classroom - R1,075 (VAT excl.)
Online - R910 (VAT excl.)

For group discounts, please contact us at:
training@academicadvance.co.za

Duration

The classroom training is 4.5 hours (from 08h30 to 13h00).

The online training takes approximately 4 to 4.5 hours to complete.

Target Audience

All clinical research personnel, who have previously completed a recognised GCP course:
Investigators, Study Coordinators, Managers etc.

Certification

Delegates are required to complete a final assessment with at least 70% accuracy.

Upon successful completion of the course, the delegate will be given access to the GCP Certificate of Completion, valid for 3 years.

CPD Points

CPD points will be issued with the certificate of completion.

(3 CPD points | 2 Ethics points).

In-house Training

In-house training will be considered, subject to viability.

Learning outcomes

Module 1: The Principles of GCP (including ICH GCP)

- Recall the importance of GCP guidelines.
- Understand the reason for country specific GCP guidelines.
- Understand the ICH-GCP principles and the practical application thereof in a clinical trial.

Module 2: SA GCP 2020 Update

- Explain the reason for the SA GCP 2020 update.
- Describe the key areas of change in each chapter.
- Understand the alignment between SA GCP 2020 and the DoH 2015.

Module 3: Latest Developments

- Latest topical issues.
