

# Online Clinical Trials Course

## INTRODUCTION TO CLINICAL TRIALS (RESEARCH) ONLINE COURSE

Discounts apply to groups

eLearning -Online

Average of 3 hours

Clinical trials are research studies conducted with humans, aimed at evaluating a medical, surgical, or behavioural intervention. It is the primary way that researchers find out if a new treatment, like a new drug or diet or medical device is safe and effective in humans.

The course has 5 modules including a "Test your knowledge" at the end of each module:

- Introduction
- Module 1: Clinical Trials
- Module 2: Phases of Clinical Trials
- Module 3: Research Bias
- Module 4: Blinding and Randomising
- Module 5: Role-players in Clinical Research

This course provides learners with foundational knowledge on Clinical Trials, Research Design, Trial Phases and Role-Players.

Medical Professionals, Students and Public who want to learn more about Clinical Research.

At the end of this course, learners will be expected to complete a final assessment:

- There are 50 multiple choice questions
- The pass mark is 70%
- Learners have (2) attempts
- A certificate will be issued on passing the assessment
- CPD Points will be issued on completion
